

How to put the ATA website on a mobile phone's home page

www.angloturkishassociation.com

For iPhones –

Here's how to add a website shortcut on the iPhone/iPad Home Screen:

- 1/. Open Safari web- browser
- 2/. Type in the website address: - www.angloturkishassociation.com
- 3/. After the website loads, tap on the share icon on the browsers toolbar — that's the rectangle with an arrow pointing upward. It's on the bar at the top of the screen on an iPad, and on the bar at the bottom of the screen on an iPhone or iPod Touch
- 4/. Tap the Add to Home Screen Icon in the Share Menu, you should now see your new bookmark on your home screen

For Android Phones

Here's how to add a website shortcut on the Android Phone Home Screen:

- 1/. Navigate to your Android web browser, e.g. Google Chrome (the icon that looks like a globe) and tap on it to open
- 2/. Type in the website address:-
www.angloturkishassociation.com
- 3/. After the website loads, tap on the Create Bookmark Icon
- 4/. Tap on the drop-down menu
- 5/. Tap "Home Screen" you should now see your new bookmark on your home screen.

Chrome for Android loads the website as a “web app” when you tap the icon, so it will get its own entry in [the app switcher](#) and won't have any browser interface getting in the way.

Other popular Android browsers also offer this feature. For example, Firefox for Android can do this if you tap the menu button, tap the Page option, and tap Add to Home Screen.

The icon

will appear on your home screen like any other app shortcut or widget, so you can drag it around and put it wherever you like.
